

My experience, combined with my dedication and enthusiasm, will enable me to make an immediate and valuable impact on your organization. In addition to the attached resume, I would like to discuss how I have improved my candidacy over the past year and how I can add value to CoEnterprise as an Junior Java Developer.

Currently, I am working as a Software Engineer intern at UNOS and help my team develop RESTful .NET web APIs. The key changes that I have contributed to these API endpoints will positively impact organ transplant recipients and the delivery of national transplant information. In addition, I designed and implemented an Angular 6.0/.Net Core 2.0/SQL application to improve internal communications and foster policy change discussion between company members. Although my work primarily consists of C# and JavaScript, my four years of undergraduate experience in OOP with Java allowed me to adapt to this company's technology stack quickly.

During the spring of 2017, I began my internship for a cloud-storage startup as a Corporate Strategy & Finance intern where I consulted company executives, directly affecting the strategic direction of the company. Specifically, I created financial models with various performance indicators to identify prospective companies for partnerships. Working with company leaders in a high-growth technology startup allowed me to develop the necessary skills to work in a fast-paced environment.

In addition, I worked as an Enterprise Information Services intern with SunTrust in the summer of 2017 where I researched mortgage industry trends and analyzed business requirements with the Product Owner. At SunTrust, I also collaborated with software developers on the Originations team in an Agile environment to help create .NET applications for clients and participated in bi-weekly sprint planning. In addition to my assigned role, I worked closely with a QA tester to learn the fundamental procedures and concepts for test automation utilizing ALM and TFS software.

With the experiences and qualities stated, I am confident that I can bring value to Davenport & Company. Please contact me via email at michael.le@richmond.edu or via phone at 908-656-1918. Thank you for your time and consideration.
